

PROJECT HIGHLIGHT

80 WILKINSON ROAD

RESIDENTIAL

A masterfully conceived multi-generational family compound, the residence balances shared living with moments of individual retreat. Its refined three-level volumes are elevated above a discreet plinth, enhancing privacy while framing expansive views of the surrounding landscape. The warmth of travertine stone is paired with the rhythmic precision of vertical screening and full-height glazing, resulting in a home that is quietly confident—layered, light-filled, and deeply grounded in its setting.

Living Room

Conceived as the calm yet expressive heart of the home, the living room is shaped by light that elevates both architecture and daily living. Layered lighting reveals the depth of travertine surfaces and full-height glazing, allowing light and shadow to shift softly throughout the day. Adjustable spotlights and concealed illumination gently articulate spaces for gathering and repose, fostering warmth, visual comfort, and understated refinement.

Kitchen & Dining

Designed for connection and functionality, the kitchen and dining area is illuminated to support both everyday routines and shared family moments. A balanced combination of recessed downlights and focused task lighting provides clarity and comfort, while warm color temperatures soften the space and accentuate material finishes. Thoughtfully positioned lighting enhances the dining experience, creating an inviting atmosphere that brings people together without overpowering the architectural simplicity.

Outdoor

The outdoor spaces are transformed into an intimate extension of the home through a layered landscape lighting approach. Soft moonlighting effects filter through greenery to create gentle silhouettes, while continuous linear lighting ties pathways and decks together with visual continuity. Accent lights and discreet fixtures provide both safety and ambience, allowing the outdoor areas to feel serene, immersive and welcoming long after sunset.

SCOPE OF WORK: SUPPLY & DELIVERY ARCHITECTURAL AND
DECORATIVE LIGHTING

ARCHITECT: AKTA

INTERIOR DESIGNER: DESIGN BASIS

LIGHTING CONSULTANT: MILLION LIGHTING
