

Exploring Pan Pacific Orchard, an Innovative Luxury Hotel Infused with Nature Along Orchard Road

The award-winning WOHA Architects have crafted Pan Pacific Orchard, an urban oasis that seamlessly blends with nature. It boasts impressive amenities, including a cascading waterfall, an outdoor beach pool, and event spaces that seem to touch the sky.

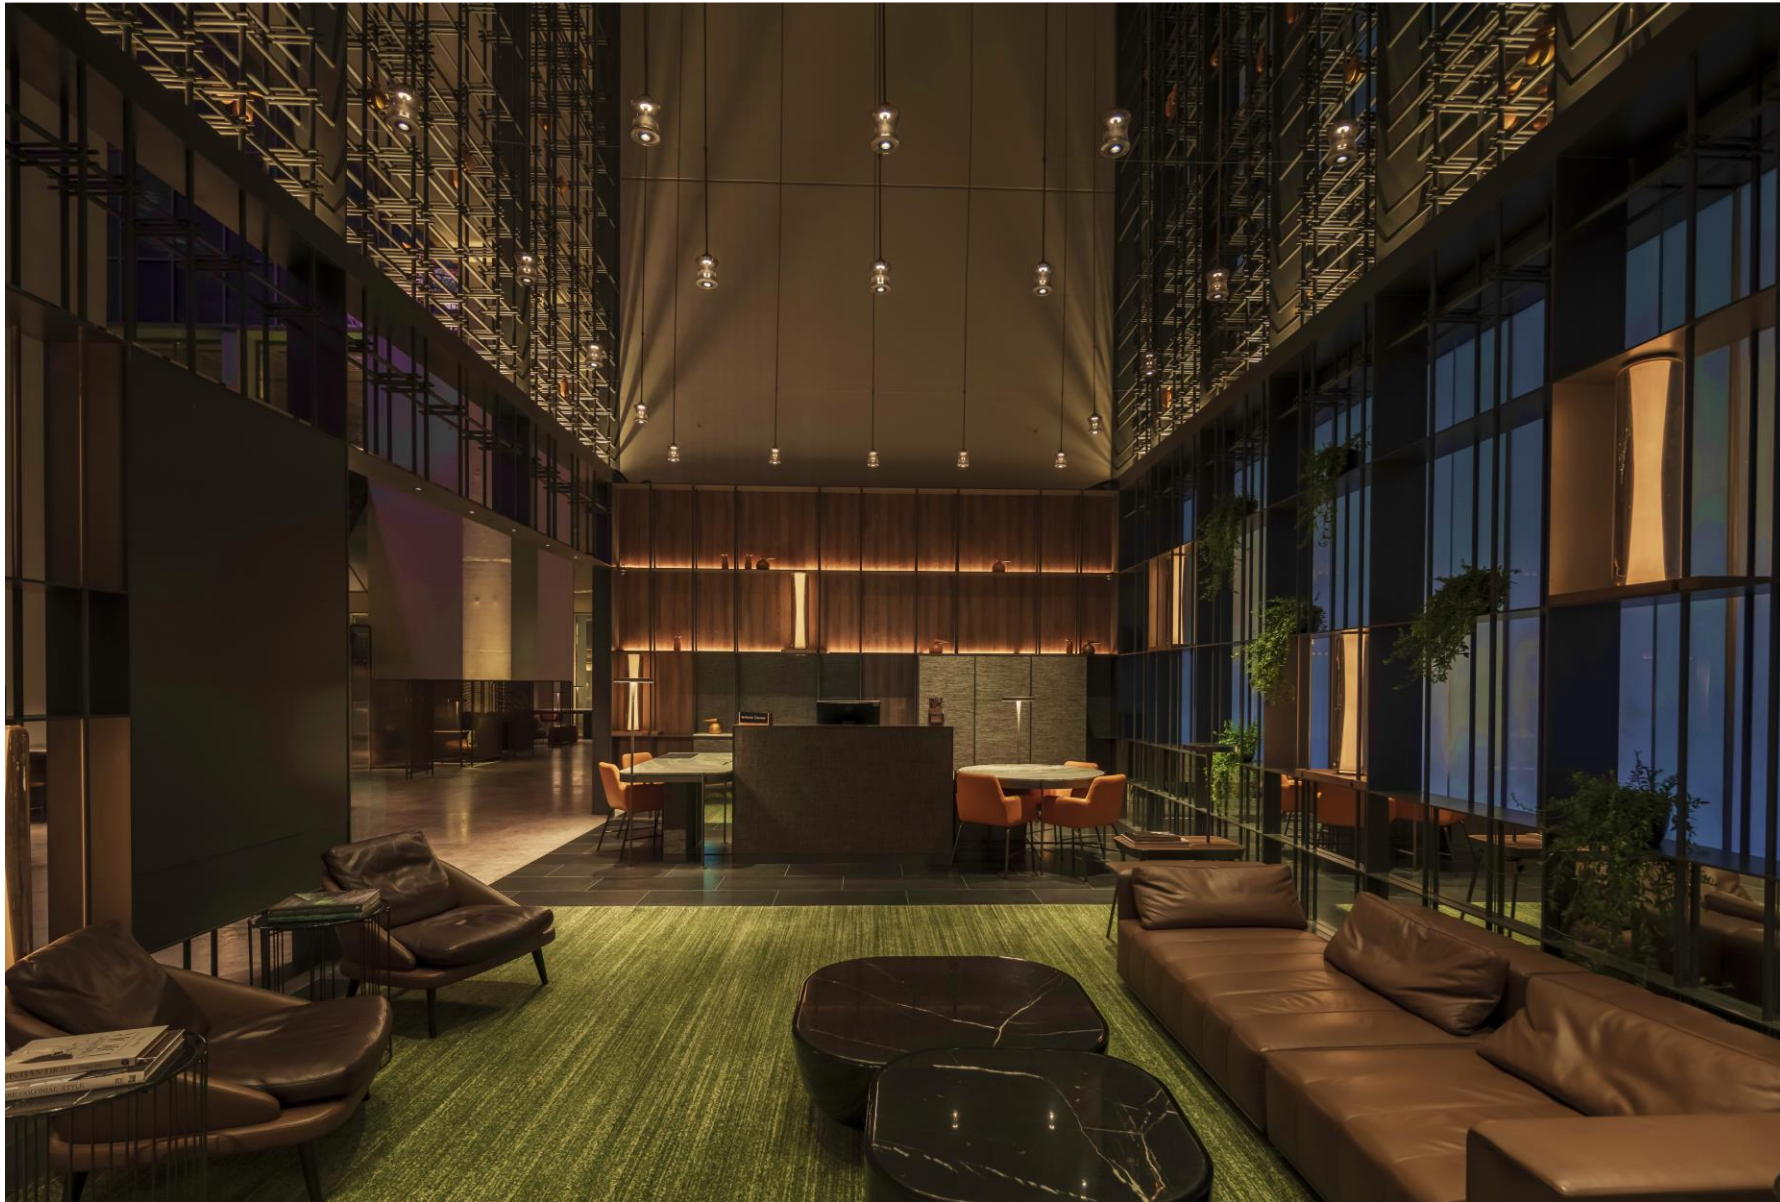

Perhaps you've spotted a striking pink structure as you strolled down Orchard Road lately, particularly in the evening when it captivates pedestrians, causing them to pause in their tracks and capture photographs of this Jenga-like edifice. A mirrored ceiling reflects the view of the pool and its lush landscaping.

The architecture of the building is divided into four stacks with four open-air sky terraces – Forest, Beach, Garden and Cloud. Each sky terrace creates its own unique experiences through different environments.

Each of the four terraces is exquisitely landscaped and visually linked through substantial green columns positioned at each corner, adorned with creeping plants destined to flourish even more luxuriantly with the passage of time.

The lobby at Pan Pacific Orchard combines modern elegance with natural elements, featuring spacious, well-lit interiors, lush greenery, and comfortable seating, creating a welcoming and multifunctional space for guests.

The Pacific Club Lounge, known for its lavish amenities and impeccable service, offers club members an exclusive and refined space to relax and enjoy their stay.

The all-day dining restaurant Mosella, features an open kitchen and a live ceviche station in its interior. At the core of the restaurant, there is a substantial mosaic column, serving as the ideal backdrop for Instagram photos and reels.

Florette Bar is a luxuriously appointed space, exquisitely designed to embody its namesake, the Roman goddess of flowers.

Experience comfort and luxury in the meticulously designed rooms and suites featuring premium bedding, as well as eco-friendly amenities like in-room filtered water dispensers and reusable bottles made from ocean-bound material.
