

The New Eco-Chic Icon in the Heart of Bukit Bintang - PARKROYAL COLLECTION Kuala Lumpur

Expanding the brand's "garden-in-a-hotel" concept beyond Singapore shores, the PARKROYAL Collection Kuala Lumpur emerges as the newest eco-chic destination for conscious travelers. With 13,000 square feet of foliage adorning the façade and its iconic biophilia and green furnishings incorporated in every guestroom, the hotel's commitment to sustainability is unparalleled. Elevating this experience, the all-day dining outlet, Thyme, expertly crafts gastronomic delights using sustainably sourced ingredients. Additionally, a dedicated floor has been designated for holistic wellness. Helmed and designed by FDAT Architects, the hotel reflects the brand's signature of earthy tones and wooden furnishes.

The Botanist Lounge & Bar is the place for a quick breather to enjoy a refreshing sip or just take in the city vibes.

Located by the pool, Skye Chill serves up a spread of light bites and beverages, along with some amazing views of the city.

In line with their hotel's biophilic design, Thyme seamlessly houses lots of leafy-green plants, which together with low lighting and smooth choice of music, make it a lovely space for breakfast, lunch and dinner.
